SEBASTIÁN AGUILAR BENAVIDES

DATA SCIENCE STUDENT & WEB DEVELOPER

seb.aguilarb@gmail.com | San José, Costa Rica | LinkedIn

PROFESSIONAL SUMMARY

Data Science student with hands-on experience in web development and application deployment. I've built classification models (Random Forest, Decision Tree), prediction APIs with FastAPI, and data analysis with Python, SQL, and Power BI, in addition to integrating REST APIs for e-commerce platforms in production. I'm looking to apply and deepen these skills in a Data Science or Machine Learning role.

EXPERIENCE

Web Developer, Teico Solutions | Internship Oct 2025-Nov 2025 → Freelance Dic 2025-Currently

- Independently developed and deployed a multi-tenant e-commerce platform, now in production for multiple merchants, which have processed over 900 orders totaling ₡8 million in billing.
- Designed the bidirectional integration with the POS system: product synchronization every 2 minutes and automatic electronic document submission, replacing a flow where everything arrived as a proforma with one that automatically generates proformas, receipts, or electronic invoices as applicable.
- Implemented post-launch improvements including new payment gateways, automatic SINPE payment validation, and Meta Pixel integration for user event tracking.

Technical Support Assistant, Clínica Dr. Marcial Fallas Díaz | Internship Sep 2024-Oct 2024

- Proposed improvements and updates to the company's website, enhancing usability and visual structure.
- Performed preventive and corrective maintenance on desktop equipment and resolved user-reported technical issues, ensuring proper functioning and continuity of operations.

EDUCATION

Bachelor's Degree in Data Science
Universidad Fidélitas | 2026 - Currently
Data Science Specialization
INCOEX Instituto Técnico Profesional | 2026
Medium Technical Degree in Web Development & High School Degree
Colegio Técnico Profesional de Alajuelita | 2023 - 2025

TECHNICAL SKILLS

- **Data Science / ML:** Python, pandas, NumPy, scikit-learn, PCA, FastAPI
- **Databases & BI:** SQL, SQL Server, Power BI, Power Query
- **Programming:** Python, HTML, CSS, JavaScript
- **Web Development:** Vue.js, Django, responsive web design
- **Development & Integration:** GitHub, REST APIs, JSON handling, third-party system integration
- **Deployment / Infrastructure:** Server deployment and administration

SOFT SKILLS

- Problem-solving
- Teamwork and collaboration
- Time management
- Productivity and punctuality
- Adaptability and fast learning
- Attention to detail

ADDITIONAL INFORMATION

Languages: Spanish (native), English (B1).
Certifications: Power BI (Santander Open Academy), Power BI Intermedio: Análisis y modelado de datos (Santander Open Academy), Fundamentos de Python 1 (NetAcad), English for IT 1 (NetAcad).

DATA SCIENCE & MACHINE LEARNING PROJECTS

Water Quality Prediction (Traffic Light System) - ML Engineer, Team academic project 2026

- Developed and deployed a prediction API with FastAPI, consumable by the rest of the team.

Olist Brazil E-commerce Analysis - Data Scientist, Team academic project 2026

- Built a SQL Server → Python → Power BI pipeline; performed sentiment classification and key phrase extraction with TF-IDF on customer reviews.
- Calculated the correlation between shipping delays and review ratings, and exported the results to SQL Server.
